

NL508 THERMOMETER & LIGHT SWITCH FOR WALK-IN COOLERS & FREEZERS

STANDARD FEATURES (part # 132453):

- LED Temperature display with °F/°C capability
- Light switch and cover
- 120 volt direct power
- 1 minute or 3 minute display update
- Switch is lighted for convenience
- Digital display easy to read in all ambient conditions
- -40°F to +230°F range

OPTIONAL FEATURES:

- Battery back-up
- 230 volt

A walk-in light switch and digital thermometer now combined in one component. The waterproof “elbow” engaged illuminated light switch allows operators to turn on the walk-in light easily, even when their hands are full. The UL listed industrial duty light switch is rated at 15 amps and is applicable for indoor or outdoor installation.

APPROVALS:

UL, NSF, C-UL, CE

NL 708 ALARM & LIGHT MANAGEMENT SYSTEM FOR WALK-IN COOLERS & FREEZERS

Introducing a total walk-in solution for food safety and energy savings.

Leaving doors open and inside lights on are the two biggest energy wasters in walk-ins. Open doors can also compromise food safety. The NL708 system provides alarms and light management to solve these problems.

STANDARD FEATURES (part # 139780):

- -40°F to +230°F range
- Hi/low temperature alarms with delays
- Light management:
 - Turn light on at keypad
 - Light timer for automatic shut off
- Easy to set alarms

OPTIONAL PACKAGES:

- Wall mount box with external 85db pulsing buzzer (part # 142456 includes NL708)
- Door open alarm and automatic light switch (part # 142457 includes part # 142456)
- Remote phone dialer (part # 142459 dialer only)
 - 2 circuit phone dialer
 - 2 channel digital input
 - 4 programmable phone numbers for each channel
- Occupancy sensor for light operation and panic alarm (part # 142458 includes part # 142457)
- Extended temperature sensor 30' (part # 142468 extended sensor only)
- Remote buzzer box (part # 142469 remote box only)
- Field retro-fit option - all styles of doors (part # 145329)
