

Be Prepared For Massive COVID-19 Vaccine Demand

NORLAKE®

The demand for COVID-19 vaccinations will extend through 2021. Make sure your facility has enough storage for all the vaccine required. Nor-Lake Scientific environmental rooms provide reliable, consistent storage with precise control of humidity and temperature. Our rooms are also designed to fit many other COVID-19-related treatment and diagnosis needs such as blood and plasma storage, sample storage and stability testing.

ENVIRO-LINE ROOMS

- Custom rooms available to suit specific storage and application requirements
- Modular construction for easy installation and relocation
- Available microprocessor controllers, alarms, monitors, temperature and humidity chart recorders, shelving, ramps, lighting, humidification and dehumidification

MINI ROOM CONTROLLED TEMPERATURE CHAMBERS

- Single room & combination cold rooms and freezers
- Installation is fast and easy
- Ceiling mount Capsule Pak™ refrigeration system
- All system components outside allowing more storage inside
- Standard sizes from 4' x 6' to 10' x 14'

MASTER CONTROLLER

The Master Controller electronic control system is standard on Mini Room refrigeration systems and is one of the many controller options available on Enviro-Line rooms.

Master Controller allows you to adjust many functions of your refrigeration system through a simple interface.

- Track interior temperature history to ensure viability of vaccines
- Ensures optimum performance with precise control for functions including evaporator fans, room temperature, electronic expansion valve and defrost
- Safely monitor and control your system from your desktop, smartphone or tablet (when using optional router)
- System alerts, text messages and emails received on your phone, computer or tablet
