NORLAKE®

SPLIT-PAK™ REMOTE REFRIGERATION SYSTEMS

Designed for Fast Installation and Long-Term Reliability

R449A REFRIGERANT

Quality Management ISO 9001:2015 DEKRA certified

Environmental Management ISO 14001 DEKRA certified

REMOTE CONDENSING UNITS

RSG Split-Pak™ condensing units are engineered for high-temperature environments.

Components are pre-wired and factory-mounted. Standard remote units up to 5 HP are available pre-charged with refrigerant and include quick-connect liquid and suction line sets up to 50 ft.

Units feature hermetic or compliant scroll compressors and are available with or without matching evaporator coils. Each is factory-assembled on a galvanized steel angle leg base and offered in sizes from 1/2 to 15 HP.

Please contact us concerning larger capacities or multi-compressor system options.

Generously-sized condenser for dependable performance

Standard pre-wiring kit

Head pressure control valve ensures proper operation in low ambient conditions

Standard weather hood for protection against the elements

Standard pre-piping kit including sight glass

Compliant, energy efficient scroll compressors featured exclusively in low temp units for added reliability

Dedicated medium temp outdoor condensing units meet the DOE requirement of a minimum AWEF rating of 7.61 (Btu/W-h).
Components may vary depending on horsepower and application. Consult factory for verification of standard and optional supplied components.

EVAPORATOR COILS

Split-Pak condensing units can be paired with matching evaporator coils for a complete, factory-engineered remote system.

Coils are ready to mount and available with air (off-cycle), electric, or optional LogiTemp® Plus Reverse Cycle Defrost.

Each includes a properly sized expansion valve and room thermostat. Energy-efficient EC motors are standard on single-phase models.

Electric defrost units also feature defrost termination/fan delay controls and drain line heaters. A pre-mounted solenoid at the evaporator is available as an option.

Built With the Installer in Mind

Split-Pak systems are designed for simple, efficient installation. Tubing connections and electrical wiring, for example, can be easily traced through the circuitry. Following these clear pathways, an installer can have a system operational very quickly, saving the customer time and money.

Split-Pak systems are also designed to be easily serviced should the need arise. Each component is chosen based on its ability to interchange and its availability for installers and service technicians. Individual components are conveniently located on the condensing unit base for easy access.

Electrical wiring in Split-Pak condensing units is easily traceable for the installer.

LOGITEMP® ELECTRONIC CONTROLLER SYSTEMS

LogiTemp is an electronic controller system designed to increase food safety while reducing energy and installation costs. It is standard on Split-Pak freezer systems 6 H.P. and above and optional on other systems.

Food Safety

- More precise and reliable controls than an all-mechanical system for increased food safety
- Should there be an issue with the refrigeration system, operators will know instantly through error codes and data provided online

Installation Savings

- No wiring is required between evaporator coils and condensing units (2 pairs of low voltage wires, typically thermostat cables, are required to operate the Reverse Cycle Defrost valve and the compressor relay at the condensing unit).
- A LogiTemp-equipped system uses less refrigerant with no winter charge necessary

Energy Savings

- Proprietary design saves up to 27% more energy than an all-mechanical system
- Demand Defrost technology initiates defrosts only as needed for further energy savings
- Defrost time, when initiated, is also greatly shortened
- Reverse Cycle Defrost option provides additional savings (see sidebar below)
- Save 2-4% more energy with the fan cycle option which saves electricity by cycling the evaporator fans during the compressor's off cycle

Connectivity

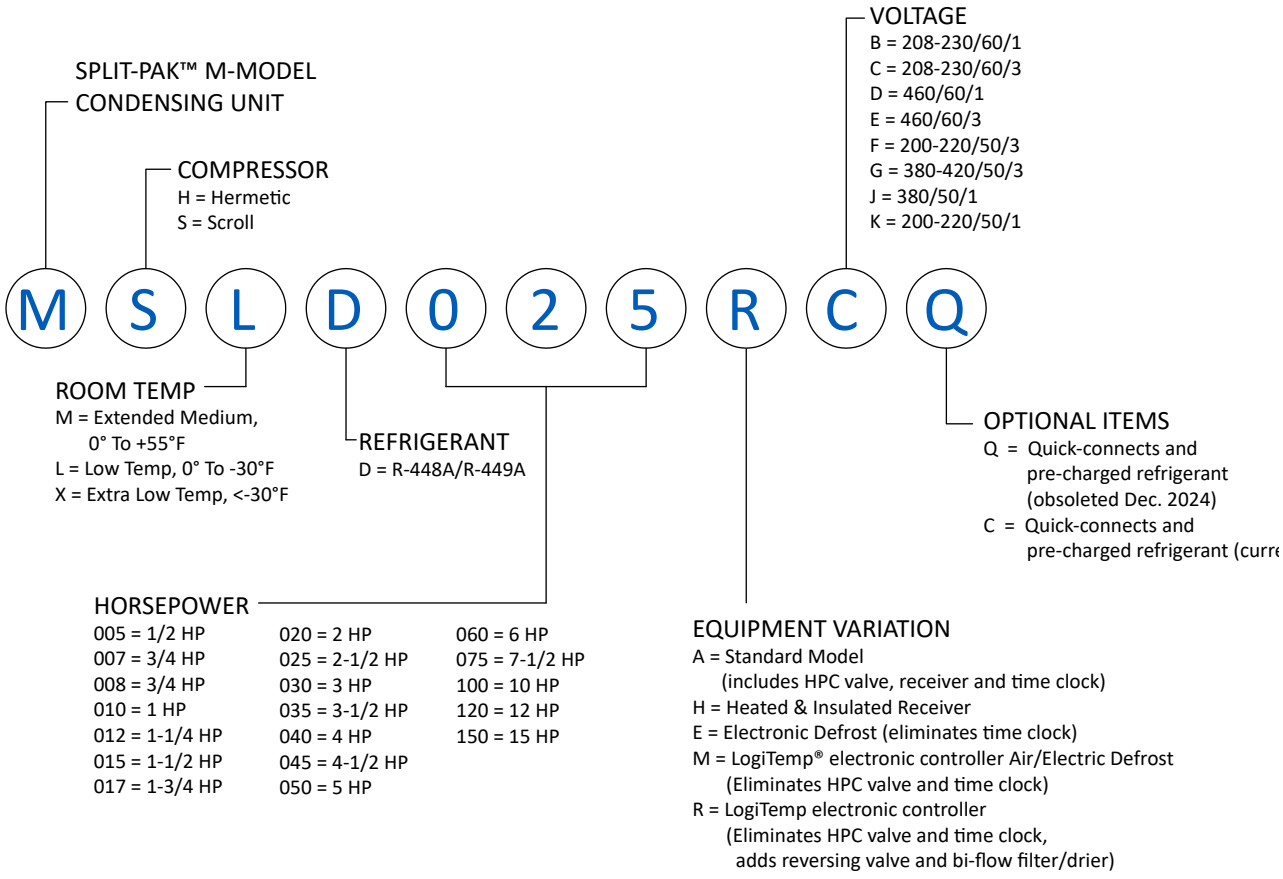
- Software allows remote monitoring and programming using any device with a wireless internet or cabled (cat 5) connection
- No need for a service tech to climb onto a roof or enter the walk-in to adjust refrigeration systems
- Constant data access allows users to improve refrigeration performance and avoid service issues

Logitemp® Plus With Reverse Cycle Defrost Option

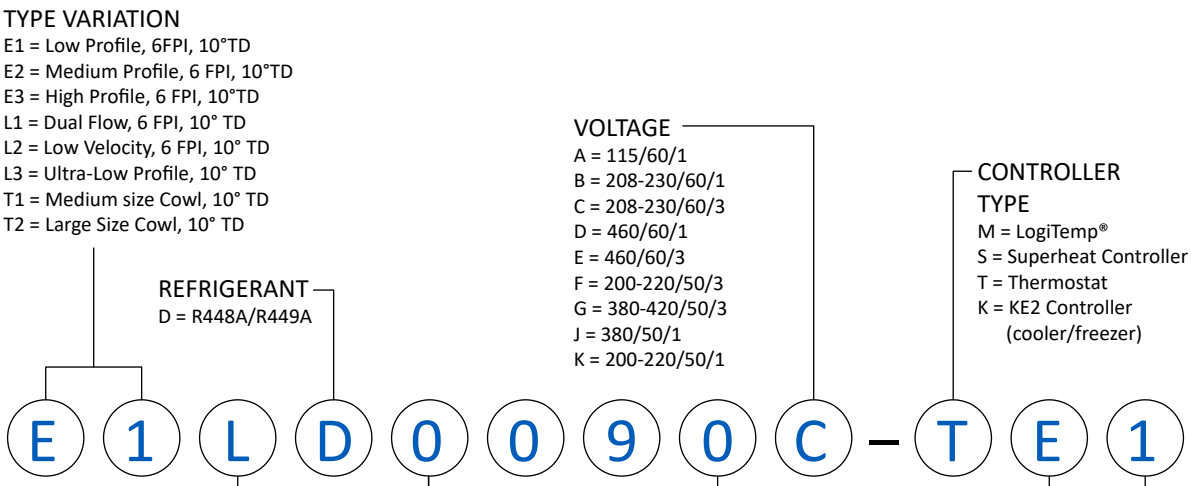
As an option on Split-Pak systems, the LogiTemp Plus controller adds a reverse cycle defrost valve to the system which offers several advantages:

- Helps prevent food spoilage by completely and rapidly removing ice build-up in evaporator coils
- Reduces defrost energy usage by up to 80% over traditional electric heaters
- The average defrost time for a freezer with electric heaters is 20-30 minutes. Reverse cycle can perform a defrost in as little as 3-5 minutes in a freezer or 1½-2 minutes in a cooler. Shorter defrost times help protect food integrity.
- Adds refrigerant savings due to reduced charge

CONDENSING UNIT MODEL NUMBER GUIDE



EVAPORATOR COIL MODEL NUMBER GUIDE



TYPE VARIATION
E1 = Low Profile, 6FPI, 10°TD
E2 = Medium Profile, 6 FPI, 10°TD
E3 = High Profile, 6 FPI, 10°TD
L1 = Dual Flow, 6 FPI, 10° TD
L2 = Low Velocity, 6 FPI, 10° TD
L3 = Ultra-Low Profile, 10° TD
T1 = Medium size Cowl, 10° TD
T2 = Large Size Cowl, 10° TD

REFRIGERANT
D = R448A/R449A

VOLTAGE
A = 115/60/1
B = 208-230/60/1
C = 208-230/60/3
D = 460/60/1
E = 460/60/3
F = 200-220/50/3
G = 380-420/50/3
J = 380/50/1
K = 200-220/50/1

CONTROLLER TYPE
M = LogiTemp®
S = Superheat Controller
T = Thermostat
K = KE2 Controller (cooler/freezer)

TEMP RANGE/ TXV TYPE
M = Extended Medium Temp, +5° to +55°F
L = Low Temp, 0° to -30°F
X = Extra-Low Temp, <-30°F

BTUH CAPACITY IN HUNDREDS
(Assumed 10° TD)

Capacity Correction Factors (Multiplier)
-20° Room Temp x 0.96
-10° Room Temp x 1.00
0° Room Temp x 1.04
+30° Room Temp x 0.98
+35° Room Temp x 1.00
+40° Room Temp x 1.02

DEFROST SCHEME
A = Air Defrost
E = Electric Defrost
R = Reverse Cycle
G = Reverse Cycle With Hot Gas Drain Pan Loop (Plasma & Rack Applications Only)

FACTORY PRE-ASSEMBLY OF COMPONENTS
Standard = Shipped Loose TXV & Temp Control
1 = Pre-Assembled With TXV & Temp Control Mounted
2 = TXV Mounted, Temp Control & Solenoid Mounted & Wired
3 = Slave Evaporator (LogiTemp Only)
Q = Quick Connects and Pre-Assembly (obsoleted December 2024)
C = Quick Connects and Pre-Assembly (current)

END suffix following the voltage ID indicates quick connects for Endless merchandisers.
