

ECO DOOR FRAME

PATENT PENDING
INNOVATION

Save 300-500 kWh a year on walk-in energy usage while enhancing durability, hygiene, and aesthetics.

RSG's ECO door frame for walk-in coolers and freezers is designed for efficiency and performance with numerous benefits to foodservice operators.

ENERGY SAVINGS

- Reduces energy consumption of walk-in cooler and freezer doors by 20-30% compared to current industrywide standards
- Low thermal conductivity minimizes heat transfer and reduces energy loss
- Meets DOE proposed standards for door U-factor and energy conservation for walk-ins

HYGIENIC AND EASY TO CLEAN

Designed for cleanliness with materials that are simple to maintain, ensuring sanitary conditions in food service environments.

DURABLE AND LOW MAINTENANCE

Built for long-lasting performance, reducing the need for frequent repairs and upkeep.

SEAMLESS RETROFIT INTEGRATION

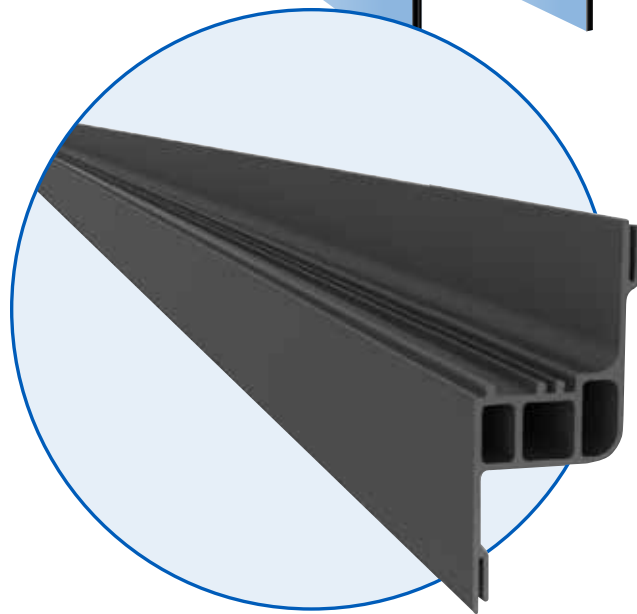

Easily retrofitted to existing systems, offering a quick and efficient upgrade for improved energy savings.

ECO-FRIENDLY JAMB

A sustainable alternative to aluminum-PVC and FRP combinations, offering durability and recyclability while minimizing material waste.

SLEEK, MODERN DESIGN

Features a uniform, high-quality finish that enhances the aesthetic of any foodservice setting.

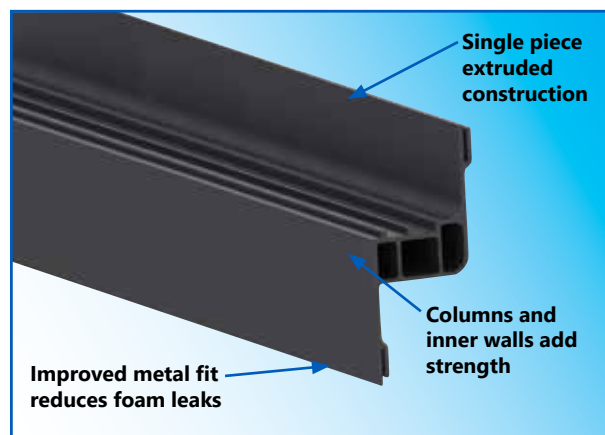

The ECO door frame features a unique one-piece design that delivers superior insulation and energy savings, all while being more cost-effective than competing options.

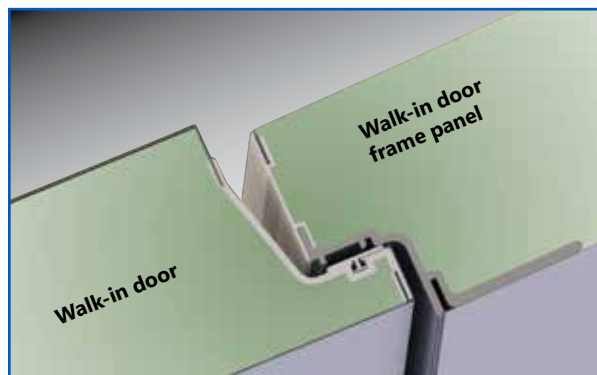

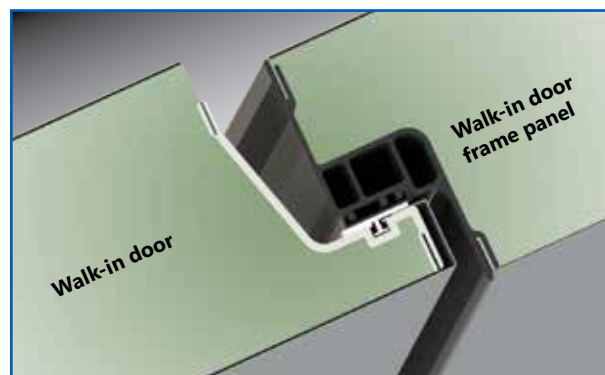

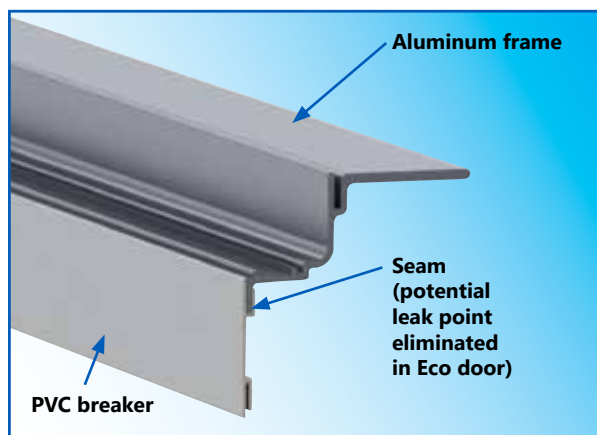

ECO DOOR VS. LEGACY FRAME

From two-piece construction to seamless strength, the ECO Door delivers improved performance over our legacy aluminum frames.

ECO DOOR FRAME

LEGACY ALUMINUM FRAME

FEATURE	ECO DOOR FRAME	LEGACY ALUMINUM FRAME
Lower door energy consumption and heater wattage on both coolers and freezers	✓	⊗
Meets 2028 DOE proposed standards for door U-factor and energy conservation for walk-ins	✓	✓
Improved corrosion resistance	✓	⊗
Single piece construction with fewer foam leaks	✓	⊗
Retrofit option for existing walk-ins	✓	✓
Sustainable design and materials	✓	⊗
Uniform finish for improved aesthetics	✓	⊗
